

Product information

Basic microfibre cloth 40 x 40 cm

Characteristics

- May be laundered 400 times (minimum);
- Absorption capacity 4 times its own weight;
- Sound finish causes no shrinkage of the microfibre cloth;
- Effectively usable due to different colours.

The Greenspeed[®] Basic microfibre cloth provides you with a basis for the daily cleaning of practically every surface.

Just like the Greenspeed[®] [Original microfibre cloth](#), the Basic removes dirt and stains from synthetic materials, glass, vinyl, stainless steel, ceramics, etc. This cloth effortlessly absorbs limescale and grease deposits, such as fingerprints, leaving a clean and smooth surface. Used dry, the Basic is a perfect duster, - damp, it removes dust and stains without problems.

Due to the sound finish of the edges of the Greenspeed[®] Original, it is a non-shrinkable microfibre cloth that, even after many launderings, keeps its original dimensions.

The microfibre technology of Greenspeed[®] guarantees quality and provides this durable cloth with its unique cleaning and absorbing capacities. It stands to reason that the Basic microfibre cloth is certified with the [Nordic Swan Ecolabel](#), the Scandinavian label that imposes strict requirements concerning environment, quality and health.
