

Product information

Original microfiber cloth 53 x 70 cm

Characteristics

- May be laundered 600 times (minimum);
- Absorption capacity 6 times its own weight;
- Sound finish causing no shrinkage.

This large Greenspeed[®] Original microfibre cloth was originally developed as a towel. For instance, the cloth may be used in the fitness club or at the swimming pool.

And, just like the smaller [Original microfibre cloth](#), this cloth has perfect cleaning and absorption capacities.

The large Original microfibre cloth is even better when used as a floor cloth. Slightly damp and in combination with a squeegee, this cloth is perfectly suited as a floor cloth for hard surfaces. This is why the large microfibre cloth is available with or without a hole in the middle.

The microfibre technology of Greenspeed[®] guarantees quality and provides this durable cloth with its unique cleaning and absorbing capacities. It stands to reason that the Original microfibre cloth is certified with the [Nordic Swan Ecolabel](#), the Scandinavian label that imposes strict requirements concerning environment, quality and health.
