

## Product Information

### Diamond Cloth

#### Characteristics

- Quickly removes stubborn dirt
- Safe on surfaces such as granite, melamine and stainless steel
- Absorbs twice its weight in water

Vigorously rubbing and scrubbing on a surface to get it clean? No problem for the Greenspeed<sup>®</sup> Diamond microfiber cloth. Hardened polyester is interwoven between the microfibers of this cloth. With this cloth, you can quickly remove stubborn dirt without effort and without damaging the surface.

The Greenspeed<sup>®</sup> Diamond microfiber cloth is perfectly suited for use on hard surfaces such as granite and melamine, but also on polished stainless steel, ceramic and enameled surfaces. This makes the Diamond microfiber cloth indispensable in bathrooms and kitchens.

After cleaning with the Diamond microfiber cloth, the surface should be wiped with a Greenspeed<sup>®</sup> Original microfiber cloth, to make sure it is hygienically clean and without wipe marks.

For the best cleaning result use EPA registered, non-toxic, biodegradable, safe-to-use, fast-acting healthcare-grade solution CLEANER 112.
