

Our Company

GREENSPEED[®] USA IS A GLOBAL PROVIDER OF ENVIRONMENTAL SANITATION AND HYGIENE TECHNOLOGIES, PRODUCTS, AND SERVICES.

Our company has emerged as a premier designer and supplier of high-quality products that are effective, easy-to-use, and produced through sustainable means.

The nature of the cleaning industry has significantly changed, and we have adapted to bring a wide variety of products to the market that meet high standards for quality and reliability.

Our Vision

GREENSPEED® is dedicated to becoming the preferred provider of innovative cleaning solutions and ergonomic products based on advanced environmental sanitation and hygiene technologies for the professional cleaning industry.

Our focus is to make environments healthier - through fast, safe, efficient, sustainable, and environmentally conscious cleaning that produces consistent and effective results.

Sustaining and Innovating – Customizing the Best Programs

GREENSPEED® continuously develops new products and services to meet the changing needs of our customers and partners with them to deliver safe, effective and sustainable solutions. Our innovative team continues to design state-of-the-art products through intense research and development of new technologies, new design techniques and new ideas.

- Continued focus on preventing and controlling infection burdens while reducing costs.
- On-going education at all levels and development of human resources by empowering them with the knowledge required to perform ICS practices.
- Promote community and individual engagement in disease prevention.

A **SYSTEM APPROACH** FOR GREENER CLEANING & DISINFECTING

It is critical to prevent environments from becoming reservoirs of unwanted and potentially harmful microorganisms and to protect patients, students, staff and visitors from potential exposure. Creating a clean and safe environment must be a priority for the Environmental Services and Housekeeping teams.

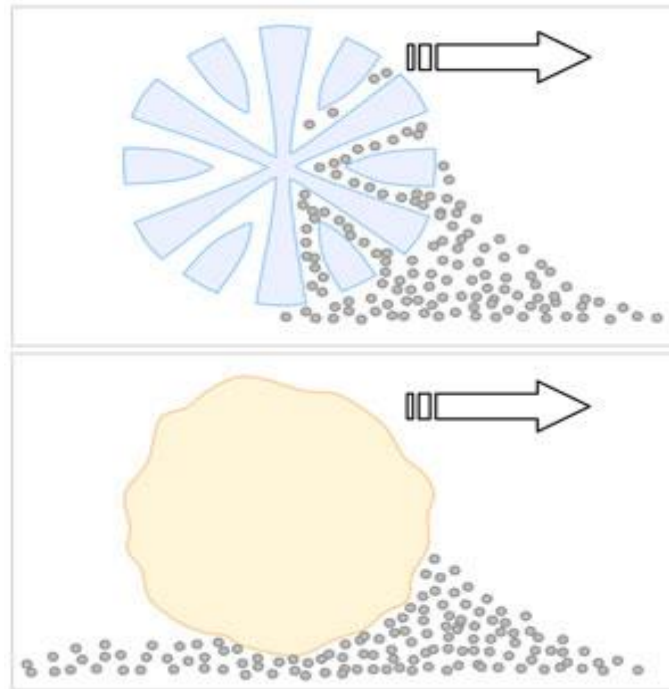

The GREENSPEED[®] INFECTION CONTROL SYSTEM and DISINFECTATION SYSTEM programs are a comprehensive system-based approach that implements a more effective, efficient, healthier and environmentally friendlier cleaning and disinfecting practice, without using excess products that may be detrimental to the health and safety of the end user.

Benefits from using Microfiber Technology

Microfiber products were identified as a best practice tool for use in the healthcare industry by the EPA in 2002. The unique nature of the product and how it is manufactured make it indispensable in cleaning and disinfecting surfaces and environments.

High-performance microfiber products (top) are usually manufactured with fiber blades smaller than 1 micron, and with significant coverage (over 300,000 blades per square inch). This provides the most significant amount of surface coverage and crevice penetration, and in turn will collect and remove the most amount of micro-organisms.

Conventional cotton products (bottom) have solid fibers that are much larger and can fail to trap harmful pathogens, essentially doing nothing more than moving them around on the surface. Also, because of their organic nature, cotton fibers end up serving as sources of food for these micro-organisms.

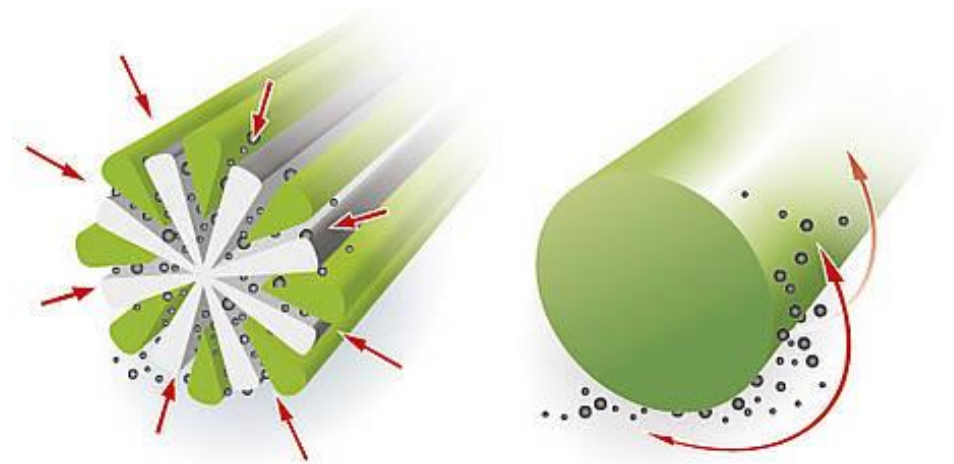

Unique Microfiber Technology

ALL MICROFIBER PRODUCTS ARE NOT EQUAL!

The GREENSPEED® INFECTION CONTROL SYSTEM and DISINFECTION SYSTEM use proprietary microfiber products that are split so that an elaborate system of hollow tubes is created. These tubes have two major advantages:

- **When the product is wet, the water attracts dust and dirt into the hollow tubes.**
- **Exceptionally high absorbency capacity.**

A damp GREENSPEED® product removes attached dirt quickly and effectively, leaving no residue when using AX-112 or AX-275. When dry, the products are ideal for use as a dust remover. The microfiber is naturally positive-static charged, and thus able to remove and hold dust and light contamination.

Microfiber Product Line

Heavy Duty Microfiber Cloth

- Unique pattern enables effective removal of dirt and spots.
- High absorption capacity.
- May be laundered >450 times.
- Thicker material while light in weight.

Original Microfiber Cloth

- Professional grade cleaning.
- High absorption capacity
- May be laundered >450 times.
- Suitable for any surface.
- Color coding for efficient use.

Microfiber Glass Cloth

- Fast, streak-free cleaning of glass surfaces.
- Effective on windows and mirrors.
- High absorption capacity.
- Color coding for efficient use.

Microfiber Sponge and ErgoGrip

- Professional grade cleaning.
- Ergonomic handle allows deep cleaning and scrubbing.
- Velcro for fast and easy changing.
- Lightweight design.

Microfiber Product Line

Triotec Diamond Mop

- Unique pattern enables effective removal of dirt and scuff marks.
- High absorption capacity.
- Thicker material while light in weight.

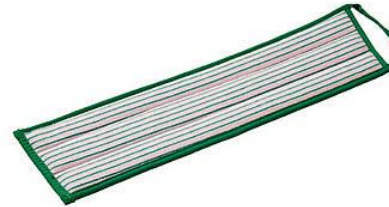

ScrubMop

- Fast cleaning of non-scratch floors.
- No spreading of dirt.
- Velcro for fast and easy changing.
- Loop for easy removal.
- Color coding for efficient use.

TwistMop

- Fast cleaning of the floor.
- No spreading of dirt.
- Easy to rinse.
- Great for larger floor areas.
- Color coding for efficient use.

MultiMop

- Large cleaning capacity.
- Foam material in mop prevents drying too quickly.
- Velcro for fast and easy changing.
- Loop for easy removal.
- Color coding for efficient use.

Microfiber Product Line

Flatmop Plate w/Standard Coupling

- Lightweight.
- Very flat (no accumulation of dirt).
- Exceptionally strong Velcro strips
- Easy to clean.

Winglet w/Standard Coupling

- Lightweight.
- Very flat (no accumulation of dirt).
- Easy to clean.
- Flexible use due to raised adjustable ends.

Sprenkler Handle

- Dosed usage of water in handle results in lower dry times.
- No toiling with buckets.
- High mobility.
- Fast and easy to use.

Click-M Magnetic Holder

- Lightweight.
- Powerful magnets hold pads in place
- Quick change design improves efficiency.

Microfiber Product Line

MachinePad

- Durable construction.
- Powerful cleaning for hard surface floors.
- Used with a slow-speed buffer or autoscrubber.
- Carpet version available.

Laundry Nets

- No shrinkage when laundered
- Secure closure keeps textiles secured within.
- Label to be used with indelible ink.

DustBow Flexible Dust Remover

- Very flexible.
- Can be used in small spaces.
- Can be used to reach heights with a telescopic handle.

Dustbowl Microfiber Cover

- Suitable for all hard surfaces.
- High dust-collection capacity.
- Fast and easily interchangeable.
- No displacement of dust.

Microfiber Product Line

FIT Microfiber All-in-One Tool

- Durable construction.
- Metered dispensing uses the right amount of solution.
- Simple controls allow for ease of use.
- Quick-Connect adapter allows for easy filling and disposal of solutions.
- Built-in rechargeable battery.
- Completely enclosed setup eliminates cross-contamination issues.

Modular Caddy Cart (with FIT)

- Lightweight yet sturdy design.
- Easy to clean.
- Modular design allows customization for different areas/uses.
- Secure storage built into cart.

NORDIC ECOLABEL Recognition

The **Nordic Ecolabel** is the official Ecolabel of the Nordic countries and was established with the purpose of providing an environmental labelling design that would contribute to sustainable consumption and as a practical tool for consumers to help them actively choose environmentally-sound products.

Products carrying the Nordic Ecolabel is a guarantee that products have fulfilled extremely stringent environmental, quality, health and longevity requirements of the Nordic Ecolabelling Program.

In May 2012, GREENSPEED® B.V. was awarded the Nordic Ecolabel license for their line of microfiber products. This achievement is clear evidence that GREENSPEED® qualifies as one of the best microfiber cloths on the international market, and a leader in promoting sustainable cleaning.
