## **FUTURE OF CLEANING & DISINFECTION = SAFETY AND NON-TOXIC**

---

**OUR MISSION: TO BRING OUR BODY'S NATURALLY PRODUCED PROTECTOR –HOCL- WHICH IS SAFE & NON-TOXIC TO THE WORLD!**

Since 2009 the World Health Organization (WHO) & the CDC keep warning and scaring us about these Infections and antibiotic resistant "Superbugs" that have no defense and we have to develop new antibiotics and treatments. WHO releases threats for the first time.

Verify at: <https://www.statnews.com/2017/02/27/who-list-bacteria-antibiotic-resistance/>

Hospital acquired Infections kill over 99,000 people a year.

Verify: <https://www.beckersasc.com/asc-quality-infection-control/7-statistics-on-healthcare-acquired-infections.html>

“Antibiotic resistance is growing and we are running out of treatment options. If we leave it to market forces alone, the new antibiotics we most urgently need are not going to be developed in time,” said Dr. Marie-Paule Kieny, the WHO’s assistant director-general for health systems and innovation.

**PREVENTION, PROTECTION & DESTRUCTION IS THE ONLY WAY TO OUTSMART SUPERBUGS!**

## CLEANING & DISINFECTION MARKETPLACE

---

THE CLEANING & DISINFECTION MARKET IN THE USA IS WORTH OVER \$20 BILLION A YEAR. CLOROX ALONE DID \$5.8 BILLION IN BLEACH SALES. SALES OF **-GREEN-CHEMICALS-** ARE GROWING, BUT.....

So-called 'green cleaning programs' still include Bleach and Ammonium. These products are respiratory irritants and irritate people's lungs and trigger asthma attacks. Bleach is corrosive. They burn eyes and skin and permanently damage carpets and clothing. Mixed together, these two chemicals create a deadly gas. Hydrogen peroxide-based products as alternative is a mutagen, a carcinogen, corrosive, reactive and is a strong oxidizer enhancing other materials to combust. Quats cause skin allergies and promote the growth of bacteria!

**MORE THAN 85,000 COMMERCIAL CHEMICALS HAVE BEEN DEVELOPED IN THE LAST 60 YEARS. WHEN HEALTH TESTING IS DONE, IT IS NORMALLY DONE ON A SINGLE CHEMICAL. HOWEVER, WE ARE USUALLY EXPOSED TO A MIXTURE OF CHEMICALS. SCIENTISTS DO NOT UNDERSTAND THE EFFECTS OF BEING EXPOSED TO MIXTURES OF CHEMICALS**

**A GREEN LABEL MEANS NOT NECESSARELY A SAFE SUSTAINABLE PRODUCT USING SAME OLD CHEMISTRY!**
