

INSTRUCTIONS FOR USE

Noroxycdiff®

1. Personal Protection Equipment:

| Application Method | Recommended PPE |
|------------------------------|---------------------------|
| <i>Spray and Wipe</i> | Gloves and Eye Protection |
| <i>Fogging</i> | Gloves and Eye Protection |
| <i>Electrostatic Sprayer</i> | Gloves and Eye Protection |

Note: Clothing protection IS NOT necessary. Noroxycdiff® will not harm clothing.

2. Product Activation:

- DO NOT ACTIVATE PRODUCT UNTIL YOU ARE READY FOR FIRST USE.
- Read product labels for handling instructions.
- Pour the entire contents (4 oz.) of ONE Noroxycdiff® Concentrate bottle into a ONE Gallon container of Demineralized Water.
- Properly dispose of the 4 oz. Noroxycdiff® concentrate bottle.
- Replace the cover on the activated ONE Gallon Noroxycdiff® container.
- Gently agitate the closed container for 15 seconds to achieve a 99:1 mix ratio.
- Write the date on the provided RTU Label and affix to the ONE Gallon container.

3. Application Instructions:

| | |
|-------------------------------|---|
| <i>To Spray and Wipe</i> | Pour activated Noroxycdiff® into a 32 oz. trigger spray bottle. Mist the surface to be disinfected with enough product to remain wet for 2 minutes. |
| <i>Fogging</i> | Pour activated Noroxycdiff® into the fogger and follow the equipment manufacturer's instructions for use. Surfaces must remain wet for a minimum of 2 minutes. |
| <i>Electrostatic Sprayers</i> | Refer to the equipment manufacturer's instructions for sprayer preparation, operation and cleanup. Operate the sprayer to apply enough product so the surface remains wet for at least 2 minutes. |
