

How much is FUNGUS affecting your wine?

Strike first to protect your harvest and increase your output using antimicrobial technology!

Extended protection from mold, mildew, fungus & bacteria

Protect all your surfaces to prevent mold issues!

- Forms shield on surfaces to inhibit the growth of mold & other fungus and odor causing bacteria; Provides extended antimicrobial protection against all molds, mildews, algae, etc.
- Environmentally friendly and once cured, product is non-toxic/non-leaching & hypoallergenic
- FDA approved safe for food contact surfaces; treat all equipment and surfaces in your wine-making facilities
- Once applied, all treated surfaces (walls, floors, ceilings) actively attract mold spores from the air and pierce on contact
- Available in various container sizes for convenient, traditional spray and electrostatic spray applications
